Java Thread Program

Three threads print messages at different intervals.

```
class GoodMorningThread extends Thread
{
    public void run()
    {
        while (true)
        {
            System.out.println("Good Morning");
            try
            {
                sleep(1000);
            }
            catch (InterruptedException e)
            {
                e.printStackTrace();
            }
        }
    }
}

class HelloThread extends Thread
{
    public void run()
    {
        while (true)
        {
            System.out.println("Hello");
            try
            {
                Thread.sleep(2000);
            }
            catch (InterruptedException e)
            {
                e.printStackTrace();
            }
        }
    }
}

class WelcomeThread extends Thread
{
    public void run()
    {
        while (true)
        {
            System.out.println("Welcome");
            try
            {
                Thread.sleep(3000);
            }
            catch (InterruptedException e)
            {
                e.printStackTrace();
            }
        }
    }
}
```
